

2023

BAKE. A comfortable and versatile chair.

PRESS RELEASE
02/2023

BAKE. A comfortable and versatile chair.

A chair with timeless lines and enveloping geometry accompanied by a range of colours reminiscent of nature: terracotta, taupe, olive green... The Bake chair is a stackable chair made from 100% recyclable polypropylene, reinforced with fibreglass for greater stability. This material is very easy to clean and is resistant to knocks and sunlight.

It is a very versatile chair as it can be used both in indoor spaces with the upholstered version with antibacterial technical fabric (hospitality, offices...), or outdoors without upholstery.

The Bake chair will be one of the novelties presented by Ezpeleta for 2023.
