

Company
profile

Our mission is to improve the well-being of patients through high-quality, functional products with meticulous design.

At the heart of our mission lies the creation of products that simplify patients' lives by providing increased comfort. Since its inception, SENIORCARE has focused on the design, manufacture, and distribution of chairs, tables, furniture, and specialized accessories for healthcare facilities (hospitals, clinics, care homes and nursing homes). Our goal is to bring a new design philosophy to this sector, reflected in our collections, where each piece combines perfect functionality and ergonomics with impeccable finishes.

Our origins: a family
business founded over
40 years ago.

Since our beginnings, our approach has been characterized by a constant focus on providing our customers with quality and close-at-hand service. Thanks to this commitment, we are proud of the fact that many customers have trusted us for many years. All the experience accumulated over time now allows us to present collections with meticulous design, crafted by our team who pays great attention to every detail, while adhering to the highest quality standards.

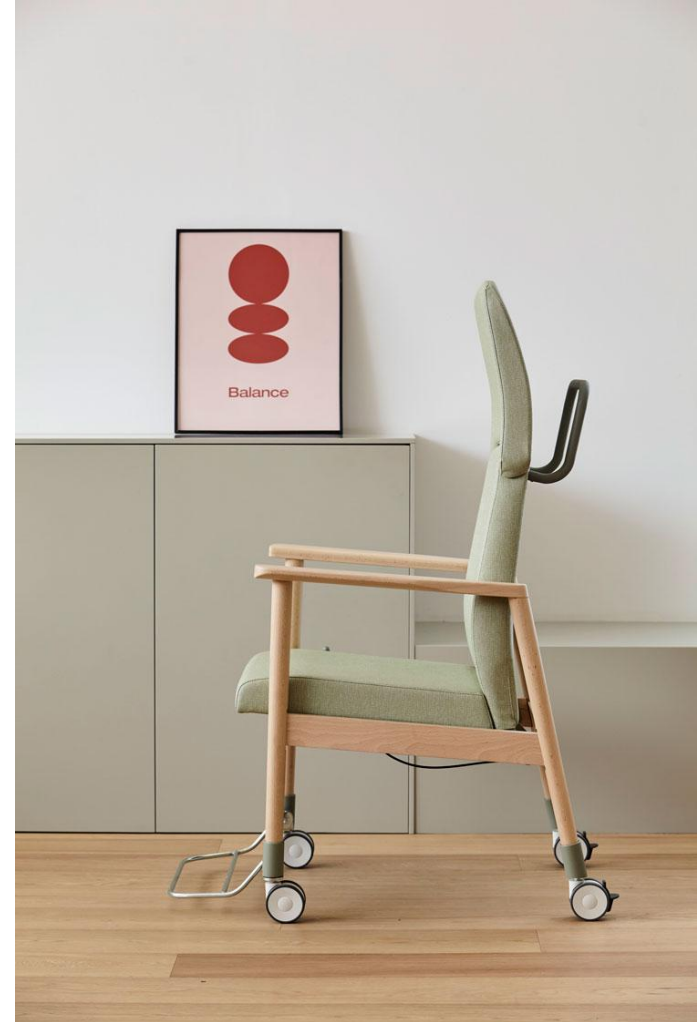

Our philosophy:
infusing our collections
with the essence of the
Mediterranean.

Our geographic location shapes our corporate identity and our philosophical approach to product design. Since our beginnings, we have infused our collections with the brightness and vibrancy characteristic of our region, literally bathed in light. This is reflected in the harmonious and luminous tones present in our collections, as well as in our extensive range of finishes.

Our commitment to quality: a team that pays attention to every detail.

All our furniture is carefully designed, from conception to finishing, and stands out for its meticulous and functional aesthetics. We prioritize the use of premium materials to ensure the durability of these products intended for intensive use. Every stage of production is handled by experienced personnel, following processes where every detail is considered to ensure the result meets the highest quality standards. We are proud that all our products are manufactured in Spain and bear the "Made in Spain" label. We have always chosen local production, skillfully combining craftsmanship and technology. Furthermore, we pay particular attention to every design detail to ensure these products are functionally simple to handle and use. We strive to exceed our clients' expectations and possess the production capacity and flexibility needed to adapt to the manufacture of special or custom pieces, allowing us to meet the unique demands of each project.

Commitment to Quality and the Environment: ISO 9001 and ISO 14001.

At Seniorcare, we are committed to providing the best service to our clients and taking care of the planet we share. That's why we have implemented an integrated quality and environmental management system in compliance with ISO 9001 and ISO 14001 standards, ensuring the processes of design, production, and distribution of our products.

At Seniorcare, we are dedicated to continuous improvement, innovation, and social responsibility. We firmly believe that healthcare furniture can be high quality and environmentally friendly.

Featured collections

unna

Design: YONOH

Traditional lounge chairs for healthcare facilities.

The **UNNA** collection reinterprets traditional lounge chairs for healthcare facilities. It features an incredibly attractive design based on the simplicity, functionality, and sturdiness of its structures. These are undoubtedly pieces of furniture hospitals and clinics that create a warm and cozy atmosphere in any environment. The collection offers a wide variety of models, including low and high-back lounge chairs, wingback chairs, and benches. Its structures are crafted from solid beechwood with rounded edges to prevent damage from impacts, and its careful upholstery provides each piece with the utmost comfort and convenience.

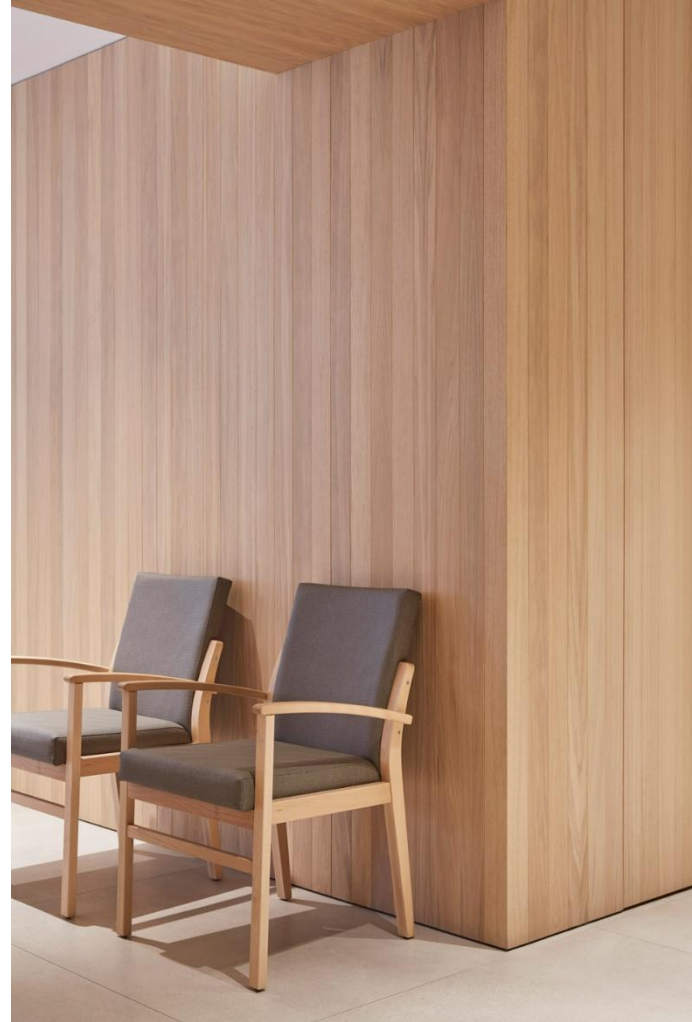

aris

Design: E. Seniorcare

Traditional armchairs for healthcare facilities.

The ARIS collection, inspired by the simplicity of Nordic design, has been specifically created for healthcare facilities. These pieces combine exceptional aesthetic appeal with superior comfort, achieved through meticulous ergonomic design.

The collection includes a wide variety of options, such as high, medium, and low-back armchairs, 2- and 3-seater benches, and chairs. Customization options feature stitched upholstery for added elegance. The use of solid beech wood, crafted with subtly rounded edges, along with a broad range of upholstery choices, makes this collection an outstanding solution for creating modern spaces that prioritize both maximum comfort and distinctive aesthetics.

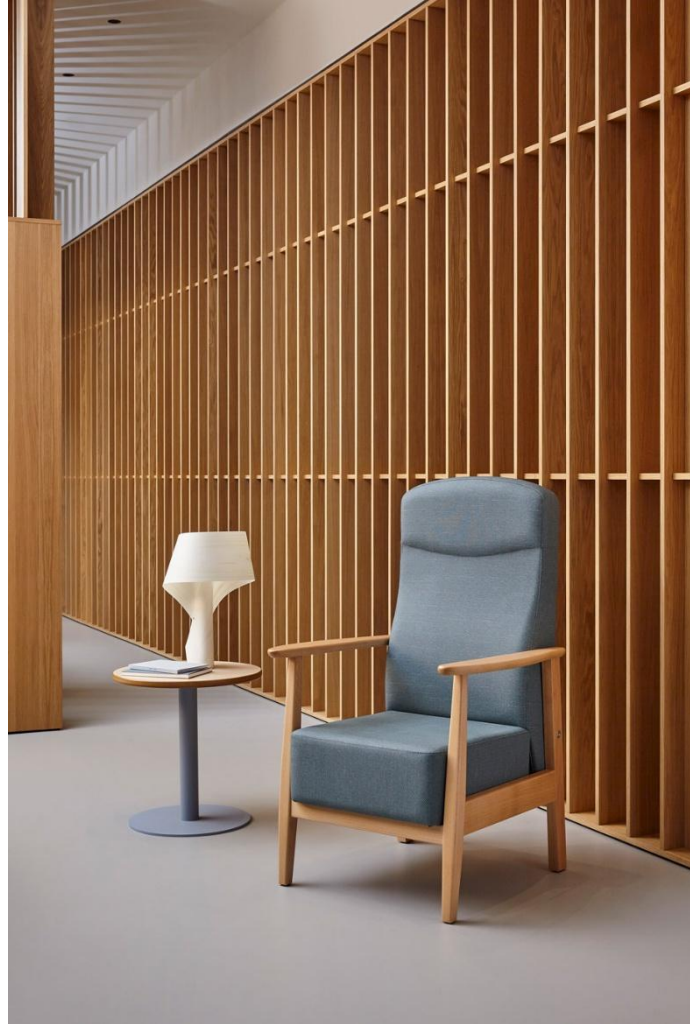

boreal

Design: E. Seniorcare

Traditional lounge chairs for healthcare facilities.

The **BOREAL** collection is based on traditional lounge chairs for elderly care facilities. Its style is simple and functional, yet its design is truly striking and modern. This furniture enhances any setting, turning the space into a warm and comfortable environment.

This collection offers a wide range of seats, including low and high-back lounge chairs, wingback chairs, and benches. All of them are distinguished by their solid beechwood frames with rounded edges to ensure the safety of individuals. The upholstery used in each piece is made from carefully selected high-quality materials, with attention to every detail to ensure maximum comfort and convenience.

cala

Design: Alegre Design

Traditional armchairs for healthcare facilities.

The **CALA** collection, designed by Alegre Design, is based on traditional lounge chairs for healthcare facilities. Its style is simple and functional, yet its design is truly striking and modern. This furniture enhances any setting, turning the space into a warm and comfortable environment.

This collection offers a wide range of seats, including low and high-back lounge chairs with or without wingback, and transport versions. All of them are distinguished by their solid beechwood frames with rounded edges to ensure the safety of individuals. The upholstery used in each piece is made from carefully selected high-quality materials, with attention to every detail to ensure maximum comfort and convenience.

wave

Design: Oddos Design

Wave is a collection of chairs and tables distinguished by their soft, inviting rounded shapes that enhance ergonomics. The chair stands out for its solid beechwood structure and a design full of character, valued not only for its aesthetics but also for its functionality. Its rear features a handle integrated into the structure, making it easy to move. The table, available in various sizes, is notable for its elegant curves and countercurves.

senta

Design: E. Seniorcare

Ergonomic armchairs for healthcare facilities.

The **SENTA** collection is characterized by its ergonomic armchairs for healthcare facilities and its practical design geared towards intensive use. A collection with simple lines and great construction robustness that offers an extraordinary quality/price ratio.

With structures crafted from solid beech wood, equipped with rounded edges to prevent damage from impacts, and meticulous upholstery to provide each piece with maximum comfort and convenience. The SENTA armchair can be seamlessly combined with any of the dining or coffee tables from our catalogue.

pilé

Design: E. Seniorcare

Armchair for healthcare facilities.

The **PILÉ** collection is characterized by its practical and stackable design, tailored for intensive use. This armchair, designed for residential and hospital facilities, is a piece with simple lines and robust construction that offers an extraordinary quality/price ratio. With structures crafted from solid beech wood, equipped with rounded edges to prevent damage from impacts, and meticulous upholstery to provide each piece with maximum comfort and convenience. The PILÉ armchair can be seamlessly combined with any of the dining or coffee tables from our catalogue.

rodas

Design: E. Seniorcare

Sturdy and durable lounge chairs designed for healthcare facilities.

The RODAS collection is characterized by its sober and sturdy appearance. These lounge chairs are designed for intensive-use environments that require furniture of high resistance and durability. The collection features lounge chairs for healthcare facilities in three backrest versions: low, medium, and high. Their metal structures crafted from highly resistant oval steel tubing, are finished with epoxy paint and meticulous upholstery to provide each piece with maximum comfort and convenience. Rounded beechwood armrests are included to prevent damage from impacts.

pandora

Design: E. Seniorcare

Lounge chairs for waiting areas, relaxation spaces, and lobbies.

The **PANDORA** collection features upholstered lounge chairs with timeless lines. Suitable for intensive use, thanks to its reinforced solid wood internal structure covered in expanded polyurethane foam. An excellent choice for enhancing waiting areas, relaxation spaces, or lobbies.

Multiple finishing possibilities are offered across all fabrics in our sample collection. It combines perfectly with any of the coffee tables from our catalogue and brings a touch of distinction in any decorative project.

geko

Design: E. Seniorcare

Lounge chair for waiting areas, relaxation spaces, or for dining rooms.

GEKO is an upholstered lounge chair with a stylish design and with a contemporary and elegant look. Its solid wood interior structure, covered with expanded polyurethane foam, makes it suitable for intensive use environments. An excellent choice for enhancing waiting areas, relaxation spaces, or dining rooms. Multiple finishing possibilities are offered across all fabrics in our sample collection. It combines perfectly with any of the coffee tables or bedside tables from our catalogue.

dai

Design: E. Seniorcare

The one-seater **DAI** lounge chair is characterized by its enveloping and soft design. This comfortable lounge chair also serves as a decorative piece. Its interior, reinforced with solid wood and covered in expanded polyurethane foam, makes it suitable for intensive-use environments. An excellent choice for enhancing waiting areas, relaxation spaces, or dining rooms. Multiple finishing possibilities are offered across all fabrics in our sample collection. DAI perfectly combines with any of the coffee tables or bedside tables from our catalogue.

nepal

Design: E. Seniorcare

The comprehensive **NEPAL** collection features ergonomic recliners for the elderly individuals, both stationary and with motion. With an elegant design meticulously crafted in every detail, these pieces stand out for their attractive presence. Maximum comfort is achieved through their ergonomic design, allowing for extended periods of use. Multiple arm options provide versatility to match any setting: wooden arms, upholstered arms, or upholstered arms with a wooden top. Also available with lift-up armrests.

madison relax

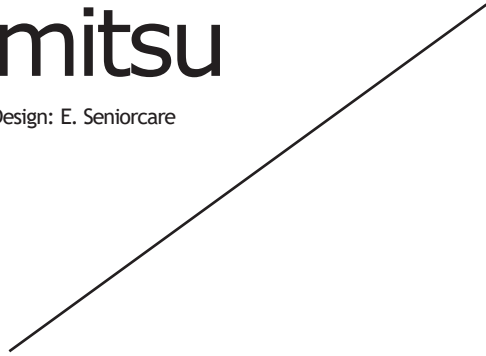

Design: E. Seniorcare

The **MADISON** recliner is characterized by its simple and timeless design. It reclines through a manual system, and it is suitable for intensive use due to its reinforced solid wood interior structure covered with expanded polyurethane foam. An excellent choice for enhancing any relaxation area or lobby. Multiple finishing possibilities are available in the wide range of fabrics from our sample collection. It perfectly complements any coffee table or bedside table from our collection. Continuous upholstery on footrest (no gaps) for comfort, safety, and ease of cleaning.

mitsu

Design: E. Seniorcare

**Sofa bed for patient rooms or staff rest areas,
featuring an easy opening mechanism.**

MITSU is a practical solution that functions as a sofa during the day and transforms into a comfortable bed at night. Specifically designed for hospitals and clinics, this sofa bed offers a user-friendly and durable opening mechanism. It is the ideal choice for creating a contemporary and welcoming ambiance. A wide range of fabric options from our collection is available for customization.

mae

Design: E. Seniorcare

The MAE furniture collection represents the perfect choice for furnishing rooms that combine neat design, modern aesthetics, comfort, warm hospitality, and functionality. This furniture for healthcare facilities has been carefully designed. It is made of high-quality melamine panels adorned with PVC edge banding. Each piece is equipped with ergonomic handles for easy handling, as well as high-quality hardware suitable for heavy-duty use. The edges and corners are rounded to prevent injuries from impacts.
