Alcor Collection

Designed by Estudi Manel Molina, the Alcor collection embodies simplicity and versatility. This multipurpose family of chairs, stools, and tables adapts seamlessly to all kinds of spaces and uses. The result is a highly functional system that is aesthetically coherent and rich in nuances. A product that is both comfortable and durable, offering an understated appearance of simplicity.

Wooden legs

The Alcor wooden chair emerges as a modern take on the traditional Scandinavian dining chair. The seat, crafted from solid wood, allows for the combination of two backrest options, both made from high-quality, pressure-molded plywood. Both versions provide an enveloping support that ensures comfort and stability.

Metal legs

The Alcor chair offers two versions of metal legs: four legs or aspa. When combined with the options for shells and finishes (epoxy colors for the metal and various wood and upholstery choices), the result is a highly adaptable chair system suitable for all types of spaces and uses.

Metal legs

The Alcor stool offers two versions of metal legs: four legs or aspa, available in two seat heights, 65 and 75 centimeters. When combined with the options for shells and finishes (epoxy colors for the metal and various wood and upholstery choices), the result is a highly adaptable stool system suitable for all types of spaces and uses.

Wooden legs

The Alcor wooden stool emerges as a modern take on the traditional Scandinavian bar stool. The seat, crafted from solid wood, is paired with a backrest made from high-quality, pressure molded plywood.

Wooden legs

The Alcor table stands out for its clean lines and versatility. It features a tabletop made of plywood and four solid ash wood legs. Available with either a rectangular or round tabletop, it also offers two options for leg angles, making it adaptable to different needs and styles.

- Finishes: stained ash.
- Polyethylene cap with integrated felt.

Product dimensions: Ø 100 y Ø 200 cm / Ø 39.3 y Ø 47.2 in

Sustainability:

- We incorporate environmental criteria in the design phase of our products, aiming to reduce their environmental impact throughout their life cycle.
- The wood we use is of European origin, and the forests are managed sustainably; only 80% of the wood produced is harvested, and for every tree cut down, at least one is planted.
- We design and manufacture with high-quality materials, aiming for our products to be part of your home for a long time. Durability and longevity are our contribution to sustainable development.
- 90% of our most important suppliers are located within 200 km of our facilities, reducing CO2 emissions related to transportation and allowing us to control our carbon footprint.
- We manufacture all our boxes in our facilities using 100% recyclable cardboard, which allows us to optimize all the components involved in packaging and reduce our carbon footprint.

Warranty:

- 2 years.

Past. Present. Future.

Cancio is the result of a family journey that began in 1959 with our grandfather Gregorio. We started as a company dedicated to the design and production of wooden furniture.

Over the years, our capabilities, facilities, and manufacturing knowledge expanded to include other materials such as metal, glass, and porcelain.

Today, the story of Cancio continues with the younger generations of the family, who, through our creations, aim to build a better world by transforming spaces into personal and attractive places where people can live, work, and connect.
